### IPLS - GRAPH/400™

To fax all your documents with complete simplicity and reliability.

**More than 25,000 fax/day  
with complete security!**

#### PERFORMANCE CHARACTERISTICS

- Immense depth of performance (more than 25,000 fax/day),
- permanent supervision of the traffic - 24 hours/24,

#### ECONOMIC

- Minimum investment (no specific hardware, no specific software - no PDM, nor Client Access, nor compiler),
- reduced transmission costs (special prices France and international - no subscription),
- lines which can be used: X25 Transpac, phone line or internet connection

#### A large VALUE-ADDED service

- Fax and telex transmission (automatic or manual)
- detailed on-line help,
- options: multitransmission, delayed transmission...
- complete audit of the traffic,
- archiving of the transmissions,
- management of the page formats and logos,
- detailed invoicing...

#### Initial fees: **1,550 EUR tax free instead of 4,000 EUR**

*SPECIAL OFFER: initial fees of GRAPH/400 amounts 1,550 EUR instead of 4,000 EUR - 3 months of guarantee, without any obligation. After 3 months, use: 640 EUR tax free per year except the costs of transmission. This offer is valid until 2003/03/31.*

For any information, call the: **01 80 41 00 60**

# GRAPH/400

To fax all your documents  
with complete simplicity and reliability

---

## Performance

- More than 1,000 fax per hour:  
*A messages test of 3,000 useful characters has been done using a P03 portable AS/400 with a low speed connection (14.4 Kbps), limit defined by the speed of the line.*
- Multi-lines, multi-boxes, multi-operators:  
*Future is protected.*

---

## Functions

- Transmissions of fax, telex, e-mail:  
*Past is spared, future is protected*
- All page codes of the wide character set EBCDIC (697) are supported simultaneously: 297 = french, 37 = US, 500 = multinational...  
*All transmited special characters are thus preserved (ex: accents, {,}, Ó, Ò...).*
- The user can choose the language of the displays: French or English (screens , help on-line, hypertext, OS/400 commands):  
*Ideal for the multinationals.*
- Distribution advices management:  
*Faxes diffusion is completely tracked*
- Applicative interface by API (OS/400 commands, RPG API, Cobol and C) :  
*Guarantee of evolutionarity.*
- Natural interfacing in OS/400 native commands, commands whose parameters are the options available of the server:  
*Any additional compiler, natural use of the server options.*
- No interface file:  
*Guarantee of upward compatibility.  
Available under 48 hours.*
- Automatic installation:  
*Two commands "Plug & Play" including the creation of an environment and its components (subsystem...).  
Implementation, support and assistance at a distance.*
- Training can be proposed.
- Downloading is available as of the installation:  
*No use of SNADS.*
- Native versions for CISC and RISC (Power):  
*delivered on a cartridge for CISC and a CD-R for RISC, no conversion.*

- Transmission of physical, logical, joints, spools files:  
*All OS/400 native files.*
- Toolbox :  
*Generator of OS/400 commands.*

---

## Managed GRAPHNET functions

- Overlay (background images):  
*Transmissions of estimate, invoices, logos, ...*
- All operational available fonts:  
*Transcoding is automatically regulated.  
Fonts are chosen by the user or automatically.*
- 75 lines of 132 columns in portrait mode, 60 lines of 170 columns in landscape mode, special mode (postscript integrated) for 198 columns and more:  
*Choice of the presentation mode.*
- Detailed and/or analytical billing with recovery of the elements on AS/400 and possible release of an applicatif program:  
*Follow-up of the transmission costs and control of the invoices.*

---

## In addition to all the functions of the teletransmission monitor

- Automatic installation,
- Full supervision of the production,
- Archiving and purge automatiques,
- Applicatives automatic alarm for the processing of the distribution advices,
- Schedule,
- Full integration with the security system of the AS/400...

---

## Evolutionary

Other communication modules can be added to communicate:

- with your banks  
*(Etebac3)*
- with your partners  
*(Atlas440, Odette , FTP ,PeSIT, X400...)*
- in EDI  
*(Atlas400, Calvacom, Diva, GEIS , IBM GN, Allegro...)*
- with the Retail  
*(Carrefour, Auchan...)*
- in TCP/IP
